LL STEP BY STEP

Purchase LL Multi Pass

Once you enter the gates of Disneyland, to head to the app and purchase it for all members in your party, maximum of 10.

Alternatively, if you have pre-purchased LLMP inside your vacation package you can skip this step.

Reserve Your First Attraction

Reserve your first attraction once you have arrived & scanned into the park.

If you are staying on-site and use your early entry window, you will be able to reserve a ride earlier than public guests.

Set Your Alarm

After you have reserved your first attraction time, set your alarm for 2 hours from now to remind you to select your second attraction.

Alternatively, you will be able to select another attraction directly after you scan into your first ride.

Rinse & Repeat

Repeat this cycle of reserving an attraction time, riding the attraction and selecting another.

If you have to wait the 2-hour window, you will have to adjust your schedule accordingly.

WHAT TO DO BEFORE YOU ARRIVE EACH DAY:

Make sure to have everyone in your party linked to the Disneyland app BEFORE entering the parks.

Add the attractions most important to you to your Genie Tip Board to avoid excess scrolling alphabetically when it's time to select your rides. Keep adjusting as the day goes on before selecting a new ride & time.

LL MULTI PASS TIPS

1

KNOW YOUR PRIORITIES

Do you want to do less running around the parks at a leisurely pace or do you want to get the most done in the shortest amount of time? If you're prioritizing getting the most done with LL Multi Pass & LL Single Pass, you may end up walking all over the parks and getting a lot of steps in! But if you're only visiting Disneyland once or twice every few years, it may be worth it.

2

KNOW YOUR 120 MINUTE WINDOW

Make First Selection Upon Arrival

Two Hours after you can select a 2nd ride

OR

Directly after you scan into a ride you can schedule another ride whichever comes first

3

FINDING THE BEST TIMES

LLMP rides are not guaranteed. The most popular rides can run out of available time selections early in the day. Snag whatever is possible & try to stack your rides back to back in the afternoon. Keep checking if a ride has sold out - they may add more availability later.

LL MULTI PASS TIPS

4

REFRESH REFRESH REFRESH

If no times seem to be available or don't work with your schedule, keep refreshing to see if any more times pop up. Right now we're seeing more times drop at around 10-15 minutes after the park opens and throughout the day randomly. But if you refresh too long, the ride may sell out completely so be careful. If you see a time even if it's less than ideal, it may be best to grab it!

5

CHANGING RIDE SELECTIONS

Once you select a lightning lane time for a ride, you can now change your return time or selection! Go to your Tip Board, select the 3 dots at the top right, and select Modify Plan. If it's a popular ride, it's better to try to modify the time than to swap it for another ride. Modifying a lightning lane does not reset the 120-minute rule, but canceling it does!

6

BUSY TIMES OF THE YEAR

We've already seen over holidays, the busiest crowds meant some people could only get 2-3 LLMP selections during their day. If you're visiting during a busy time, be open & realistic about this before purchasing LLMP during these times. Lightning Lane Single Passes still seem beneficial if you're able to grab them before they sell out!
